

Swivel Joint Roof Drain System

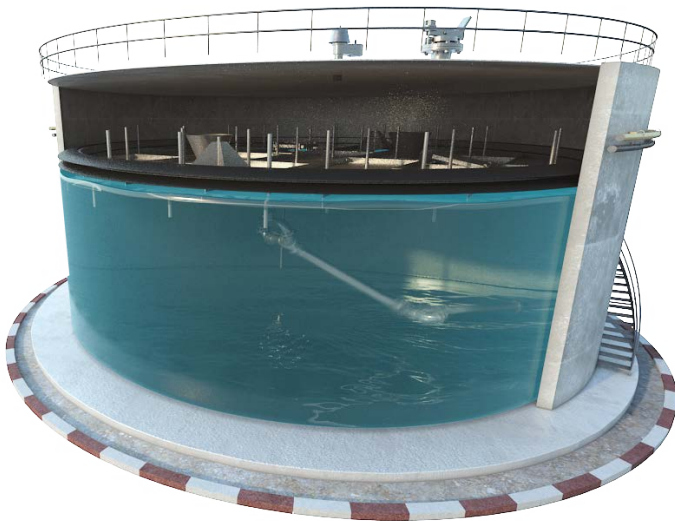

Model 800

Product Description

Swivel Joint Roof Drain System - Model 800 is especially applicable to external floating roof storage tanks in order to drain the rain water. With the correct material selection, it is suitable for all kinds of stored products.

Product Benefits

- Easy to install and use.
- Special design for each application.
- Reliable swivel joint, which does not need spare part or maintenance.
- Long service life.

Applications

The Storagetech Swivel Joint Roof Drain System is essential for operators of floating roof storage tanks seeking to enhance safety, efficiency, and environmental compliance. It is ideally suited for:

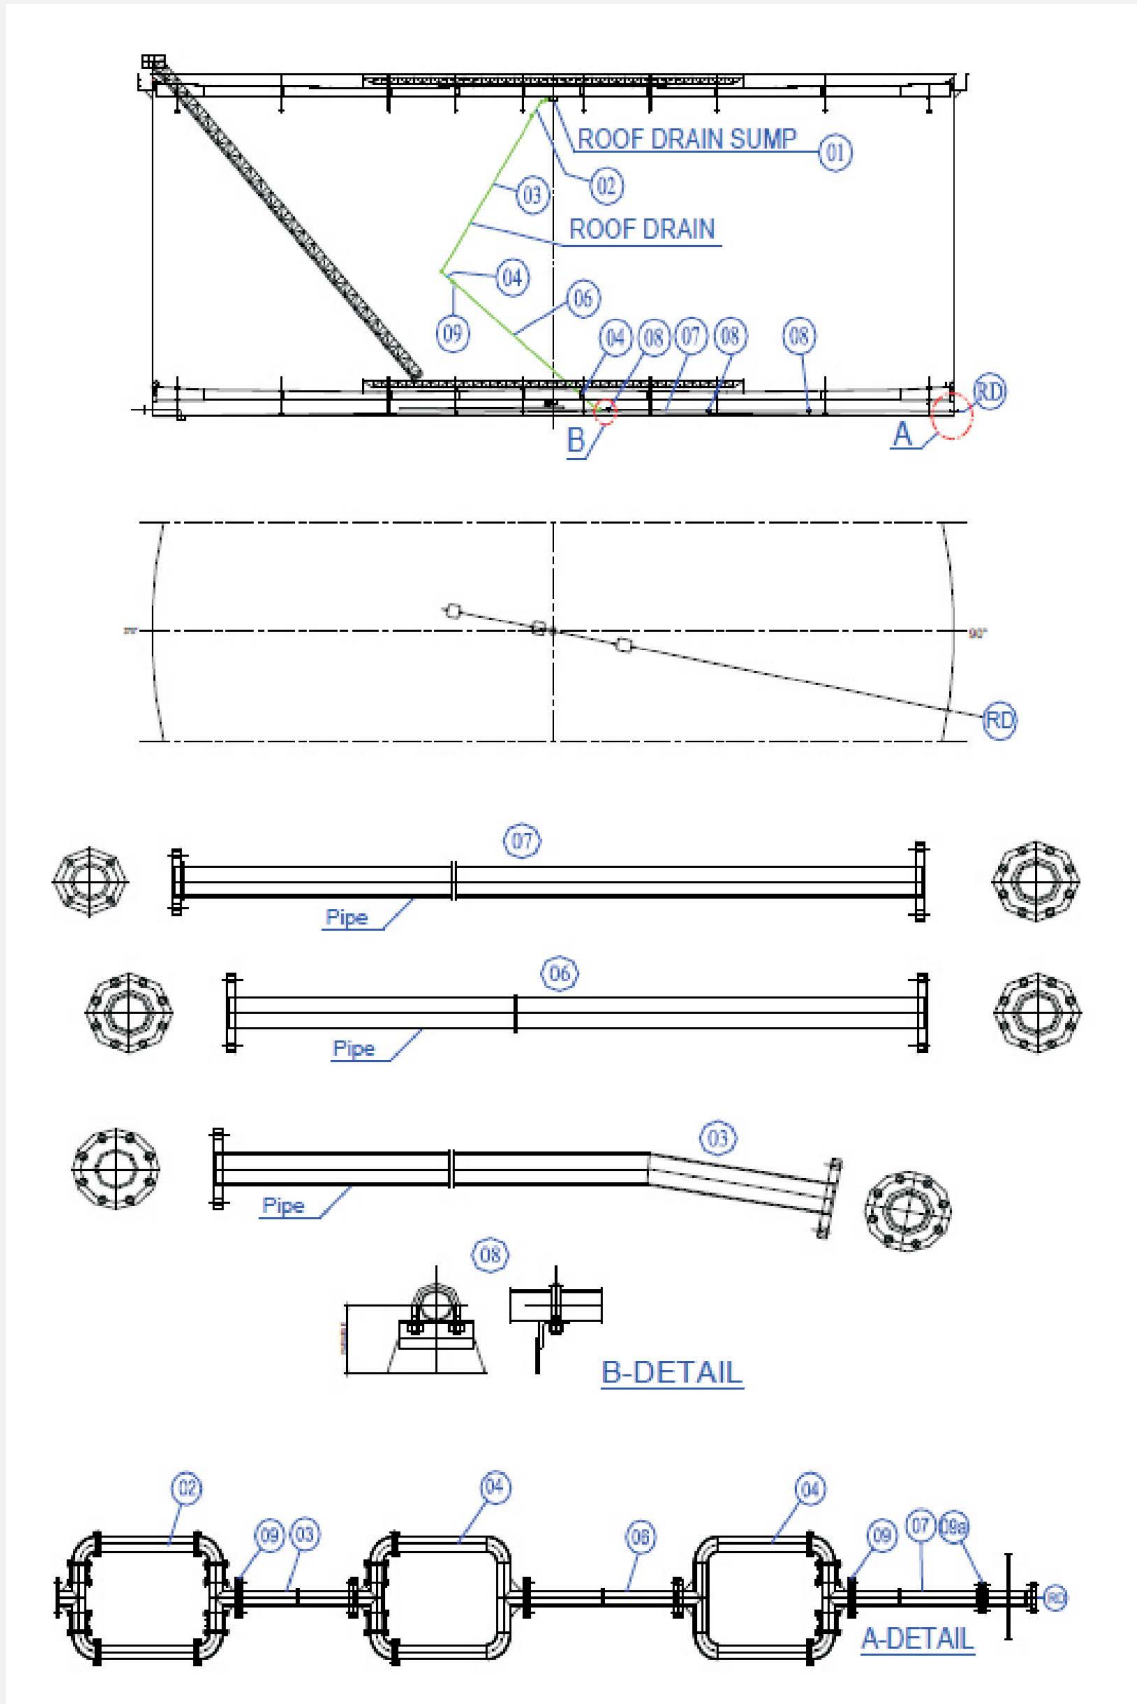

- Oil Refineries
- Petrochemical Plants
- Bulk Liquid Storage Facilities
- Water Treatment Plants

Key Features

- **Advanced Swivel Joint Technology:** Utilizes a high-quality swivel joint that allows for complete 360-degree rotation, facilitating optimal positioning and drainage efficiency.
- **Durable Construction:** Made from premium materials resistant to corrosion and wear, ensuring long-term reliability and performance under harsh environmental conditions.
- **Flexible Design:** Accommodates the movement of the floating roof, providing effective drainage throughout the tank's operational cycle.
- **Easy Installation and Maintenance:** Designed for quick installation and easy access for maintenance, reducing downtime and operational costs.
- **Compatibility:** Suitable for a wide range of floating roof storage tanks, including oil, petrochemical, and water storage applications.
- **Customizable Solutions:** Available in various sizes and materials to meet specific operational requirements and environmental conditions.
